- Technical Support Included

Ideal for use in remote locations with limited access to on-site interpreters, when last minute needs come up, or for short sessions.

Video Remote Interpreting

Imagine being able to access a qualified interpreter from anywhere!

VRI from Deaf Services Unlimited delivers real-time, convenient and affordable American Sign Language interpreting services using web-based video technology.

How VRI works

With DSU, you simply need a laptop or tablet and a high-speed internet connection. The Hearing and Deaf participants are in the same location and the interpreter is located remotely. The hearing individual talks to the Deaf individual while the interpreter signs and voices what is being said. Communication is relayed back and forth among the video remote interpreter, Deaf, and hearing persons for seamless communication.

Get Started

Using DSU VRI is as easy as launching a web browser. To guarantee the best possible services, we provide a complimentary test call ahead of your scheduled appointment and unlimited technical support.

VRI works great in many settings

- Business meetings
- Presentations
- Medical appointments
- Classrooms
- Conferences
- Legal appointments

It's easy to schedule a DSU VRI session.
